Welcome to Prevention Initiative Monitoring

Starting July 1, 2026, the Illinois Department of Early Childhood (IDEC) officially became the lead agency for Early Childhood Block Grant (ECBG) Prevention Initiative (PI), and a range of other early childhood support to families, providers, and educators.

IDEC provides funding to grantees through the ECBG to deliver high-quality PI education and support services. Monitoring is a key component of this process and fulfills the state's obligation to ensure effective oversight and continuous improvement in both compliance and program quality.

IDEC is committed to upholding the Illinois Administrative Rules for monitoring, supporting quality improvement, and maintaining compliance with *Early Childhood Block Grant Administrative Rules (Part 2050, Subpart A)* and the current fiscal year PI Request for Proposals (RFP). To conduct these monitoring visits, IDEC has partnered with the Vander Weele Group (VWG), a national grants monitoring firm.

For inquiries related to the transition of PI to IDEC, please refer to the [Transition FAQ](#). For further support, visit IDEC's [Contact Page](#) to submit questions.

Section 1: PI Monitoring Process

Monitoring Process Overview

Data Survey

To make the upcoming monitoring process smoother and more convenient, VWG will send a brief survey to all selected programs. You can expect to receive the survey at the start of the monitoring season. This survey gathers key information about your program, including languages spoken, program type, recording equipment needs, and any special circumstances affecting your program. This information helps us optimize assessor assignments, plan efficient travel, and minimize disruptions to your program.

Scheduling Email

The VWG lead assessor will email you to schedule your program's monitoring. While all compliance and quality assessments are generally scheduled to be completed within the monitoring period, additional time to conduct the Infant/Toddler Environment Rating Scale (ITERS-3) and Family Child Care Environment Rating Scale (FCCERS-3) observations may be required, depending upon individual program characteristics.

Preparation Meeting and SharePoint Window

To begin the monitoring process, you will participate in a **virtual preparation meeting** with a VWG assessor. You will join the meeting via Microsoft Teams (no account needed!). This meeting helps you get comfortable with the monitoring process quickly and efficiently. The assessor will walk you through the monitoring expectations and timeline, provide a link to your secure Microsoft SharePoint folder, and show you how to upload documentation. The assessor will also explain how the SharePoint subfolders are organized, review documentation options, and confirm deadlines. This virtual meeting typically takes about an hour. You must submit all required documentation electronically through your SharePoint folder for a secure and efficient process. To protect sensitive data and Personally Identifiable Information (PII), **documentation cannot be sent via email or taken as hard copies.**

Compliance and Quality

See the following sections of this guide for more information on compliance and quality assessments and protocol:

Section 2: Compliance Monitoring for All Grantee Programs

Section 3: Quality Evaluation for All Grantee Programs

Section 4: Quality Assessment for Grantees with Center-Based Programs and Family Child Care Homes

Section 5: Quality Assessment for Grantees with Home Visiting Programs

Exit Meeting

An in-person site visit is required for each grantee, which may include an ERSI tool quality observation, a PIQET-3 Supervisor interview, and/or a meeting to review the Exit Form.

During the Exit Meeting, the assessor will note outstanding items on the Exit Form and allow a final opportunity for submission. To conclude the visit, both the assessor and the designated official (typically the person who uploaded the documentation) will review and sign the Exit Form to indicate agreement on compliance and quality items that had no documents submitted, and confirm other information such as the program type and model, number of Full-Time Equivalent (FTE) staff, etc.

It is important to note that the assessor does not provide detailed feedback on compliance during the Exit Meeting. Once the monitoring period ends, the assessor conducts a comprehensive review of all documentation and completes a final summary report. This final report contains detailed information about compliance and non-compliance, as well as any other final assessment outcomes.

What Happens After Monitoring is Complete?

After the monitoring period, VWG assessors objectively analyze all gathered information and compile a comprehensive report. Our assessors are rigorously trained to ensure reliability and follow a standardized approach for all assessments. The report, which includes both compliance and quality results.

This summary report identifies any areas where your program's documented practices do not fully comply with the Illinois Department of Early Childhood's Prevention Initiative Compliance Checklist.

While your program may adhere to the guidelines of a specific program model, it is essential to prioritize meeting IDEC's requirements as outlined in the Prevention Initiative Compliance Checklist (PICC). In cases where there are discrepancies, the stricter rule takes precedence to ensure compliance with both the funding source and your chosen program model. Please remember that IDEC has the final authority on determining compliance for all items detailed in the final report.

An IDEC Grant Program Specialist will follow up with each grantee to share the monitoring report. IDEC also provides technical assistance through a third-party vendor. Once monitoring is complete, your main contact shifts from the Vander Weele Group to IDEC.

For the most up-to-date information on Prevention Initiative monitoring, please refer to the resources available on the [IDEC Early Childhood Prevention Initiative website](#).

Email contacts for IDEC:

For general questions, contact your assigned Grant Program Specialist (see [IDEC Early Childhood Prevention Initiative](#)), or reach out to dec.earlychi@illinois.gov. For questions about the Continuous Quality Improvement Plan (CQIP), contact dec.picqip@illinois.gov.

Section 2: Compliance Monitoring for All Grantee Programs

Prevention Initiative Compliance Checklist

The Prevention Initiative Compliance Checklist (PICC) is the official monitoring instrument used by IDEC for all Prevention Initiative-funded Birth to Three programs. Programs are required to meet PICC criteria derived from the following standards:

- *Early Childhood Block Grant Administrative Rules, Part 2050, Subpart A*
- The PI Request for Proposal (RFP) and the fiscal year electronic grant
- Illinois Birth to Five Program Standards
- The Illinois Early Learning Guidelines

VWG assessors review documentation submitted during the grantee's scheduled monitoring period. Documentation includes items such as the program mission statement, the policies and procedures manual, annual self-assessments and evaluations, Continuous Quality Improvement Plans (CQIP), and professional development plans. Assessors also review child/family files randomly selected from program caseloads to perform the PICC monitoring review.

The PICC is divided into four different tables with compliance requirements that apply depending on the types of programs the grantee operates with PI funding:

- Prevention Initiative
- Home Visiting
- Supplemental Doula Services (may not apply to all home visiting programs)
- Department of Children and Family Services (DCFS) Licensed Center-Based and DCFS Licensed Family Child Care Homes

PICC Documentation

The PICC is updated annually and posted on the IDEC Prevention Initiative website by September 1 of each monitoring year. Review the FY27 PICC for documentation requirements.

Documentation for the PICC is uploaded to SharePoint during the scheduled window. See the uploading instructions in [Section 6: Documentation Uploading to SharePoint](#). SharePoint folders are organized according to a structure reflecting the PICC requirements for documentation, but the order may be reorganized and grouped according to documentation types. The VWG assessor reviews the folder structure and documentation requirements during the preparation meeting. Review the PICC for a complete list of documentation options.

PICC Child/Family File Review and Documentation

Child/family files are randomly selected by assessors from currently enrolled children/clients and those that have exited within the current fiscal year (July 1, 2026, to June 30, 2027). Grantees upload documentation for the selected child/family files to SharePoint for compliance review during the scheduled SharePoint window. On the day of the Exit Meeting, your assessor also randomly selects a few active files, depending on your caseload size, if possible. The maximum number of files required for review per site is 12. See the table below for an *estimate* of selection methods for child/family files.

Total Files per Site	Uploaded		On-Site Active
	Active	Exited	
12	8	2*	2

**More exited files may be selected if the site does not have enough active enrollment at the time of monitoring.*

Child/Family File Review Protocol

Caseload/Enrollment Lists

During the preparation meeting, VWG assessors will request caseload/enrollment lists of currently active children/families and those who exited within the current fiscal year. Prenatal clients are also subject to file review.

A spreadsheet is provided to grantees prior to the preparation meeting for submitting lists of enrolled and exited children. The SharePoint folders are secure for storing sensitive information.

Note: Files from the current fiscal year are reviewed *unless additional information is required*. Child files are selected randomly from both currently enrolled children/families and any child/family with an exit date of July 1, 2026, or later. If any PICC documentation is Not Applicable due to the random selection process, additional documents must be submitted. This includes, but is not limited to, program policies, signed statements from a PI supervisor, and/or additional child files from any fiscal year. If staff serve children/families identified as Prevention Initiative, they are subject to PI monitoring regardless of their funding stream.

Child/Family File Documentation

Grantees submit child/family file documents, including, but not limited to, the following categories: *

- Home visit plan
- Developmental screenings, consent, and results summary forms
- Evidence that screening results are shared
- Proof of eligibility, such as income verification
- Parent Interview Form
- Individualized Family Goal Plan
- Transition Plan
- Referrals

*Review the PICC for a complete list of child/family file documentation options.

Multisite Grantees

Twelve files are selected at random per site as caseload/enrollment allows.

Section 3: Quality Evaluation for All Grantee Programs

Prevention Initiative Quality Evaluation Tool, Third Edition (PIQET-3)

What is the PIQET-3?

Developed, updated, and maintained by Vander Weele Group on behalf of the Illinois Department of Early Childhood, the PIQET-3 supports the administration and monitoring of the Prevention Initiative Early Childhood Block Grant program. This tool provides valuable insights into the effective operation of high-quality programs, going beyond basic compliance to examine key organizational factors that contribute to success. A copy of the PIQET-3 and scoring information can be found on the [IDEC Prevention Initiative](#) website.

The PIQET-3 utilizes a multi-method approach to data collection:

- **Supervisor Interviews:** Interviews with program administrators provide qualitative information on leadership, organizational climate, and program implementation.
- **Staff Surveys:** Brief, online, anonymous surveys distributed to staff members gather qualitative data on their perspectives and experiences within the program.
- **Documentation:** Review of some documents provided for compliance review and a few more documents specifically for the PIQET-3.

The PIQET-3 examines four critical areas:

- **Functional Organizational Climate:** Evaluating the effectiveness of data systems, financial management, and program planning.
- **Curriculum and Service Delivery:** Assessing fidelity to the chosen curriculum or program model and how well programs meet the individual needs of children and families.
- **Family and Community Engagement:** Examining family participation, referral processes, and collaborative relationships within the community.
- **Implementation Leadership:** Analyzing the effectiveness of leadership, staff support, performance assessment, and employee morale and retention.

The PIQET-3 report highlights key strengths and opportunities for growth, helping programs identify targeted areas for quality improvement.

Section 4: Quality Assessment for Grantees with Center-Based Programs and Family Child Care Homes

Infant/Toddler Environment Rating Scale (ITERS-3)

What is the ITERS-3?

The ITERS-3 is an observation-based tool from the Environment Rating Scale (ERS) family of research-based tools designed to assess the quality of early childhood programs. Assessors use the ITERS-3 to measure environmental provisions and teacher-child interactions that affect the broad developmental milestones of infants and toddlers.

Additional information about the ITERS-3, including scale information about the 33 items organized into six subscales, can be found by navigating to the following website: <https://ERS/ITERS-3>

Center-Based Program Quality

The ITERS-3 provides information about the quality of center-based programs and guides program leaders and practitioners toward creating high-quality programs for the children, families, and communities they serve.

ITERS-3 Observations Protocol

Classrooms are randomly selected when the assessor arrives, and observations occur during the monitoring period as time allows. If this is not possible, the monitoring period will be lengthened, and grantees will be notified. Grantees are not given exact dates for the classroom observations. Observations can only occur during the required designated PI classroom hours, capped at a maximum of three hours. At least one PI-funded classroom will be observed per site. Personal Care Routines will not be scored.

ITERS-3 Scoring

The scoring details will be separated into *Not Applicable Items*, *Strengths: Items With Scores of 5 and Above*, and *Areas of Potential Growth: Items With Scores Less than 5*. For Areas of Potential Growth, a brief explanation of the indicator and reason for the lower score will be provided.

Family Child Care Environment Rating Scale (FCCERS-3)

What is the FCCERS-3?

The FCCERS-3 is an observation-based tool from the Environment Rating Scale (ERS) family of research-based tools created to assess the quality of early childhood programs. The FCCERS-3 measures the quality aspects of family child care homes serving infants through school-aged children.

Additional information about the FCCERS-3, including scale information about the 33 items organized into six subscales, can be found by navigating to the following website: <https://ERS/FCCERS-3>

Family Child Care Homes Program Quality

The FCCERS-3 provides information about the quality of family child care homes and guides program leaders and practitioners toward creating high-quality programs for the children, families, and communities they serve.

FCCERS-3 Observations Protocol

Each of the grantee's family child care homes is considered a separate site, and every site receives an observation. Observations occur during the monitoring period as time allows. If this is not possible, the monitoring period will be lengthened, and grantees will be notified. Grantees will not be given exact dates for the observations. The observation must occur during the designated PI hours, capped at a maximum of three hours. Personal Care Routines will not be scored.

FCCERS-3 Scoring

The scoring details will be separated into *Not Applicable Items*, *Strengths: Items With Scores of 5 and Above*, and *Areas of Potential Growth: Items With Scores Less than 5*. For Areas of Potential Growth, a brief explanation of the indicator and the reason for the lower score will be provided.

Section 5: Quality Assessment for Grantees with Home Visiting Programs

Home Visit Rating Scales (HOVRS-3)

What is the HOVRS-3?

The Home Visit Rating Scales-3 (HOVRS-3) is a valuable tool designed to assess and enhance the quality of home visiting programs. It provides critical feedback to both home visitors and their supervisors, enabling them to identify areas of strength and areas for improvement.¹

The HOVRS-3 is grounded in the developmental parenting approach, which emphasizes building strong parent-child relationships and supporting parents' understanding of child development. For more information on this approach, refer to *Developmental parenting: A guide for early childhood practitioners*.²

HOVRS-3 Observation Protocol

During scheduling, grantees will be instructed that **all home visitors should obtain family consent (using VWG consent forms found in the addendum of this guide) and record at least one home visit for submission. This includes home visitors who have been employed for 90 calendar days as of the preparation meeting for monitoring and supervisors who have an active caseload.** VWG assessors will randomly select a percentage of videos to collect adequate data.

Grantees will upload home visit recordings to a secure SharePoint folder (unless another method is needed). Recorded observations will be randomly selected for assessment from those submitted and across all home visitors. Other methods, such as in-person observations, can be arranged as needed.

HOVRS-3 videos can be submitted in any language. Grantees will have until the exit meeting to submit their required videos. If more time is needed to submit videos, please inform your assessor for approval. The tool is designed for in-person visits that are at least 60 minutes in length.

Recording Equipment

Grantees may use their own equipment for recording and submitting video observations for this requirement. Grantees that need to borrow recording equipment should notify their assessor if they did not respond yes to the question about recording equipment on the Data Survey sent at the beginning of the monitoring year (see [Data Survey](#), p. 5).

Home Visiting Program Quality

The final report summarizes the quality of your home visiting services based on a review of randomly selected home visit observations. It provides a general overview of your program's performance and highlights key trends.

¹ Citation: Roggman, L., Cook, G., Innocenti, M., Jump Norman, V., Boyce, L., Christiansen, K., Olson, T. (2018). The Home Visit Rating Scales-3.

² Citation: Roggman, L. A., Boyce, L. K., & Innocenti, M. S. (2008). *Developmental parenting: A guide for early childhood practitioners*. Paul H. Brookes Pub. Co. Baltimore, MD.

Key Points:

- The focus is on program-wide trends, not individual home visitor performance.
- Individual home visitor information is kept confidential.
- Use this information to identify areas of strength and areas for program improvement.

HOVRS-3 Scoring

Subscales are scored using the following key. In the final monitoring report, scores above 4.50 are considered strengths and scores below 4.49 are considered areas of potential growth.

HOVRS-3 Subscale Score Key:

- **Needs support** = 1
- **Adequate** = 3
- **Good** = 5
- **Excellent** = 7

HOVRS-3 and HOVRS A+ Crosswalk

The VWG PI assessment team maintains reliability on the HOVRS-3. Due to licensing restrictions, other versions of the tool are not available for training or practice unless expressly granted by the tool developers. Because some programs may not have access to HOVRS-3, a crosswalk document compares the HOVRS-3 to the readily available HOVRS A+. This crosswalk outlines the key differences between the two versions, including scale title changes, item rearrangements, and wording updates. The crosswalk is available on the [IDEC Prevention Initiative](#) website.

HOVRS-3 Scales and Subscales

The HOVRS-3 includes seven rating scales: four for home visiting practices and three for family engagement and interaction during home visits. The first four scales on practices are used for PI monitoring. Each scale has a set of subscales, as shown below.

Scale 1: Relationship Building With Family

- 1.1 To Show Respect and Acceptance of the Family System
- 1.2 To Interact Sociably With Caregivers, Focusing on Child Development
- 1.3 To Set the Tone for Positive Interactions
- 1.4 To Express Positive Emotions About the Home Visit
- 1.5 To Engage Other Family Members Who Interact With the Child if Present During the Home Visit
- 1.6 To Reflect With Family About Their Life and Activities in Relation to Child's Development
- 1.7 To Discuss Possibly Sensitive Issues Respectfully and Reflectively

Scale 2: Responsiveness to Family Strengths and Cultures

- 2.1 To Plan Activities and Topics of This or a Future Home Visit With the Caregiver
- 2.2 To Prepare for the Home Visit Using Caregiver-Selected Activities
- 2.3 To Respond to Family Input for the Agenda and Activities of the Home Visit
- 2.4 To Adapt Activities to the Family's Interests and Needs
- 2.5 To Get Information About the Family's Strengths and Child's Development
- 2.6 To Provide Feedback to the Caregiver on Family Strengths for Supporting Child Development

Scale 3: Facilitation of Caregiver-Child Interaction

- 3.1 To Engage the Caregiver and the Child Together
- 3.2 To Elicit Ongoing Caregiver-Child Interactions During the Home Visit
- 3.3 To Directly Encourage Generally Positive Caregiver-Child Interactions During This Home Visit
- 3.4 To Support Caregiver Responsiveness to Child Cues
- 3.5 To Promote Developmentally Supportive Interactions During This Home Visit
- 3.6 To Help Caregivers Use the Family's Routines, Activities, or Available Materials to Support Child Development During This Home Visit

Scale 4: Collaboration with Caregivers as Partners

- 4.1 To Encourage the Caregiver's Ideas and Interests for Interactions or Activities With the Child During This Home Visit
- 4.2 To Keep the Caregiver in the "Teacher" Role
- 4.3 To Follow the Lead of the Caregiver and Child in Pace and Activities
- 4.4 To Avoid Intruding on or Ignoring Caregiver-Child Interactions During This Home Visit
- 4.5 To Allow Caregiver-Child Interactions to Continue Uninterrupted

Preparing to Record Your Home Visit Observation

To prepare for your home visit observation, please review the following guidelines:

- **Visits to Avoid:** Do not submit recordings of first visits, prenatal visits, or visits where a developmental screening, Individualized Family Service Plan review, or similar activity is planned.
- **Recording and Submission:** Each home visitor (employed 90 calendar days as of the preparation meeting/start of the monitoring period) records and submits one home visit observation. This includes supervisors with an active caseload.
- **Consent:** Written consent forms must be obtained and submitted for each participating family and the home visitor. VWG provides these forms at the end of this document; only these forms can be accepted.
- **Virtual Visits:** Recordings of virtual home visits are acceptable for submission if they adhere to the guidelines in this document.
- **Previously Recorded Visits:** You may use a previously recorded home visit if it was recorded within the last six months of the preparation meeting, if the family has given consent, and if the home visitor is still employed.
- **Recording Length:** The recording should capture the entire home visit from start to finish and be at least 60 minutes long to ensure assessors can observe significant events during greeting and departure. Uploading a shorter video is at the Grantee's discretion.
- **Focus on Interaction:** The purpose of the observation is to see how the home visitor interacts with the family. The home visitor, child(ren), and caregiver(s) should all be visible in the recording.
- **Supervisor Review:** Before submitting the recording, have a supervisor review it to ensure it meets the guidelines and has no technical issues with sound or video.
- **Typical Visit:** Choose a typical home visit that shows the parent and child interacting with each other and the home visitor.

Obtaining Consent for Home Visit Recordings

Before recording a home visit for your monitoring observation, you must obtain written consent from both the family and the home visitor. **Use the "Parent or Guardian Consent for the Use of Recorded Observations" form provided by VWG in the Addendum at the end of this document. Program-specific consent forms cannot be accepted.**

When discussing consent with families, emphasize that the recording focuses on the quality of the home visit, not on evaluating the family. Explain that the recording helps home visitors and supervisors reflect on their practices and ensure they are implementing best practices to improve outcomes for the family and child.

If obtaining consent is challenging, alternative options are available to fulfill this monitoring requirement. Contact Laura@vanderweelegroup.net to discuss alternatives, such as an in-person observation.

Preparing for Monitoring and Accessing SharePoint

Before Your Monitoring Visit

To ensure a smooth and efficient monitoring experience, we highly recommend taking these steps to prepare your documentation for SharePoint:

1. **Organize Electronically:** Prepare all documentation in an electronic format for easy upload to SharePoint. Remember that Google Drive is not directly compatible with SharePoint (see instructions for uploading files from Google Drive below).
2. **Organize Child Files:** Organize all active and exited child files from the current fiscal year (July 1, 2026, to June 30, 2027). Ensure all required documentation is readily available to upload within each file for random selection.
3. **Final Review:** Before the end of the monitoring window, designate one person to review all grantee folders in SharePoint. This review should ensure that each folder contains the correct documentation, the information is clearly presented, and no files are corrupted.
4. **Address Missing Documentation:** If any PICC requirement is missing from a child's folder or other documentation folder, upload a statement explaining what is missing and why. Do not leave any folders empty. This ensures a more accurate review.

Accessing SharePoint

You will receive access to the VWG SharePoint portal on the day of your preparation meeting. A personalized link will be emailed to the designated person(s) responsible for uploading. This link can only be used by individuals with permission to access the folder.

To Access SharePoint

1. **Click the Link:** Click on the link sent via email. The folder will open in your browser unless your computer has certain security blocking software. You may need assistance from your organization in allowing SharePoint access if you experience trouble in this step.
2. **Important Notes:**
 - Your VWG assessor provides complete instructions and guidance on accessing and using SharePoint during the preparation meeting. They are available to support you throughout the process.

Organizing Your Documents in SharePoint

Your SharePoint folder is organized into subfolders for your convenience. Each folder includes helpful comments to guide you on what to upload, and some folders contain due dates.

- **Reference Materials:** This folder contains helpful resources like a copy of the monitoring guide, the PICC, and other support materials.
- **PICC:** Upload all compliance documentation into the corresponding subfolders within the PICC folder.
- **PIQET Documentation:** Upload the required PIQET-3 documentation into this folder.
- **HOVRS (Home-Visiting Programs Only):** If you are a home-visiting program, upload your recorded home visit observations into this folder.

Select Files to Upload

To upload PICC documentation, click on the PICC folder, then select the appropriate folder or subfolder labeled with the PICC item number and description.

Next, select the **Create or Upload** button. A drop-down menu opens. Select the applicable document type or **Files upload**.

Another window opens for the location of your documents, such as Desktop or OneDrive. Navigate to the folder, choose the file you would like to upload, and click Open. The upload status is indicated at the bottom of the SharePoint screen.

Use the **Reload this page** icon on the top left of the screen to ensure the upload was successful, then open the document to confirm it is legible and that everything was uploaded correctly.

Tips for Uploading Documents and Videos to SharePoint

Uploading Documents

- **If your documents are stored electronically on your computer or Microsoft OneDrive, you can upload them directly to SharePoint.** There is no need to print and scan! Scanning is only necessary for paper documents that do not have an electronic copy.
- **If you use Google Drive, you will need to download the files to your computer first.** SharePoint and Google Drive are not directly compatible. Download the files from Google Drive to your computer, then upload them to SharePoint.

Here is how to download files from Google Drive and upload them to SharePoint:

1. **Download:** In Google Drive, select the file(s) you want to upload to SharePoint, then click the download icon. Choose a location on your computer to save the file(s) (e.g., your Desktop).
2. **Upload:** Once the download is complete, go to the SharePoint folder (you will receive access at the start of monitoring) and click "Upload." Choose the downloaded file(s) from your computer and click "Open" to start the upload.

Uploading Recorded Home Visits

- **Internet Speed and Computer Space Can Affect Upload Speed.** For optimal performance, use a location with a high-speed internet connection (like your main office).
- **Free Up Space:** Empty the Trash/Recycle Bin on your computer and in Microsoft OneDrive (if applicable).
- **Close Unnecessary Programs:** To avoid slowing down the upload, close any unnecessary tabs and programs, including email.

Need help? Your assessor will support you throughout the monitoring period. Do not hesitate to contact them if you have any technology issues. Technology issues related to your own internet or computer may require you to contact someone within your organization.

Thank You and Next Steps

Thank you for reviewing this guide as you prepare for FY27 monitoring. We look forward to working with you this year! To help us ensure a positive monitoring experience, we will send you a satisfaction survey at the conclusion of your monitoring process.

Remember, for the most up-to-date information on Prevention Initiative monitoring, please visit the [IDEC Prevention Initiative](#) website.

Addendum

HOVRS-3 Consent Forms

The following page contains the Home Visitor and Family Consent forms. Please complete these forms **before** recording the home visit and return them to your supervisor. All consent forms are due on the first day of your monitoring window.

Parent or Guardian Consent for the Use of Recorded Observations

This form gives consent to digitally record a home visit with you and your child. This is part of the Illinois Department of Early Childhood (IDEC) Prevention Initiative (PI) monitoring process, which helps improve services and outcomes for families.

The recording focuses on the home visit itself, not you or your family. Your participation is voluntary and will not affect your home visiting services.

Key Information

- Purpose: The recording is for internal use by the PI program and the Vander Weele Group (VWG) to provide feedback and help home visitors improve their skills.
- Confidentiality: Recordings will not be shared publicly.
- What's recorded: The recording may include your home and other family members. Separate consent is needed for anyone who actively participates in the visit. Others in the background may be recorded without consent.

By signing below, I voluntarily give permission to the **[name of PI program]** and the Vander Weele Group (VWG) to digitally record a home visit. I understand the recording is for program improvement and will be kept confidential.

Parent/guardian consent form	
Child's name:	
Date of consent:	
Parent/guardian signature:	
Printed name:	
Relationship to child:	
Optional - Child's gender and date of birth:	

Home Visitor Acknowledgment/Authorization

I have read and understood the description of the monitoring process and the following:

- I will submit a recording of a home visit to be scored using the **HOVRS-3 observation-based assessment**.
- My name and any identifying information will remain confidential.
- Not submitting a recording could result in an in-person observation.

Home visitor consent form	
Home visitor first and last name:	
Date of consent:	
Home visitor signature:	

Consentimiento De Los Padres Para La Observación Grabada Digitalmente

Este formulario da el consentimiento para grabar digitalmente una visita domiciliaria con usted y su hijo. Esto es parte de un proceso de monitoreo de la **Iniciativa de Prevención (PI) de la Junta de Educación del Estado de Illinois (IDEC)**, que ayuda a mejorar los servicios y los resultados para las familias. La grabación se centra en la visita domiciliaria en sí, no en usted o su familia. Su participación es **voluntaria** y no afectará sus servicios de visitas domiciliarias.

Información clave

- **Propósito:** La grabación es para uso interno del programa PI y el Vander Wee Group (VWG) para dar retroalimentación y ayudar a los visitantes domiciliarios a mejorar sus habilidades.
- **Confidencialidad:** Las grabaciones no se compartirán públicamente.
- **Qué se graba:** La grabación puede incluir su hogar y otros miembros de la familia. Se necesita un consentimiento por separado para cualquier persona que participe activamente, mientras que otras personas en el segundo plano pueden ser grabadas sin consentimiento.

Al firmar a continuación, doy mi consentimiento voluntario al **[nombre del programa PI]** y al **Vander Wee Group (VWG)** para grabar digitalmente una visita domiciliaria. Entiendo que la grabación es para la mejora del programa y se mantendrá confidencial.

Al firmar a continuación, doy mi consentimiento voluntario al **[nombre del programa PI]** y al Vander Wee Group (VWG) para grabar digitalmente una visita domiciliaria. Entiendo que la grabación es para la mejora del programa y se mantendrá confidencial.

Consentimiento de los padres para la observación grabada digitalmente	
Nombre de niño:	
Fecha de consentimiento:	
Firma del padre/cuidador:	
Nombre impreso:	
Relación con el niño:	
Información opcional - proporcione el sexo y la fecha de nacimiento del niño:	

Reconocimiento y Autorización Del Visitante Domiciliario

He leído y comprendido la descripción del proceso de monitoreo, así como los siguientes puntos:

- Enviaré la grabación de una visita al hogar para que sea evaluada mediante la herramienta de observación HOVRS-3.
- Tanto mi nombre como cualquier otro dato personal se mantendrán bajo estricta confidencialidad.
- Entiendo que no enviar la grabación puede resultar en una observación en persona.

Formulario de consentimiento del visitante domiciliario	
Nombre y apellido del visitante domiciliario:	
Fecha de consentimiento:	
Firma del visitante domiciliario:
